Summary

- Mobile application developer with hands-on experience in **Flutter** and native **iOS development using Swift and SwiftUI**.
- Skilled in Dart, Swift, state management, REST APIs, databases, Firebase, cloud messaging, and responsive UI development.
- Experienced in building scalable, maintainable applications with offline storage, real-time features, and platform-specific mobile experiences.
- Focused on clean architecture, performance, usability, and continuously learning modern mobile development technologies.

Experience

Mobile App Developer (Full Time - Remote) — Cognate Digital **Oct 2025 – Present**

- Develop and maintain production-level mobile applications using **Flutter, Dart, Bloc, and Provider**, focusing on performance, maintainability, and user experience.
- Contribute to native iOS development using **Swift and SwiftUI**, building platform-specific features and modern mobile interfaces.
- Collaborate remotely through Git-based workflows, code reviews, and API integration to deliver reliable mobile solutions.

Project: MoneyControl iOS

- **Tech Stack:** Swift, SwiftUI, Native iOS Development
- Developed a native iOS personal finance application featuring an interactive dashboard, income and expense tracking, and budget management.
- Built intuitive transaction entry flows and modern SwiftUI interfaces to simplify financial tracking and improve usability.

Projects

Daily Expense Tracker **Nov 2024 – Feb 2025**

- **Tech Stack:** Flutter, Dart, SQLite, MySQL, Bloc
- Developed a cross-platform expense tracking application for daily, monthly, and yearly financial management with **offline-first storage**.
- Implemented interactive charts for spending insights and **SQLite** for reliable local data persistence.
- Optimized performance for low-resource devices and designed a clean, responsive UI using Bloc state management.

MoneyControl iOS

Education

Bachelor of Science (BSc) in Software Engineering **Sep 2026 - Aug 2030**
[Daffodil International University-DIU]

Skills

Programming Languages: Dart, Swift, Python, JavaScript, SQL

Mobile Development: Flutter, iOS Development, SwiftUI, UIKit, Cross-Platform Development

Technologies & Tools: Xcode, Android Studio, Claude code, Agentic AI, MCPs, Git, GitHub, Firebase, MySQL, Docker, Postman, GitHub Actions

Languages: English (Business Level), Bengali (Native)
